

AAP / MDAAP Fetal Alcohol Spectrum Disorders Education and Training Series

November 9, 19, and 28, 2018

(rev. 10-30-18)

Webinar #1: FASD: Screening, Assessment, and Diagnosis

Friday, November 9, 2018 at 12:15-1:15 p.m. ET

This webinar will focus on defining the terms used to describe the conditions that fall under the umbrella of FASDs, describing the signs that may indicate prenatal alcohol exposure and a possible condition along the continuum of FASDs. Participants will be oriented to the diagnostic assessment including the areas of the brain affected by prenatal alcohol exposure, approaches to delivering the diagnosis, and indications for referral. Faculty will reinforce the benefits of a diagnosis and demonstrate how to address issues around stigma in both assessing for prenatal alcohol exposure and delivering a FASDs diagnosis.

Learning Objectives: At the end of this webinar, participants will be able to:

- 1) Describe diagnostic criteria for conditions along the continuum of FASDs.
- 2) Understand the differential diagnoses of FASDs.
- 3) Explain the importance of screening all patients for a history of in utero alcohol exposure.

Speaker: Dr. Renee Turchi is a member of AAP's Council on Children with Disabilities and its FASD Champions Network. She serves on the Academy's Section on Administration and Practice Management. Dr. Turchi is the Section Chief of General Pediatrics and Medical Director of the Center for Children and Youth with Special Health Care Needs at St. Christopher's Hospital for Children. Her academic appointments include serving as Associate Professor at Drexel University's School of Public Health (Department of Community, Health and Prevention) and its College of Medicine (Department of Pediatrics). She is the Medical Director of the Pennsylvania Medical Home Program and transition program.

Webinar #2: Neurobehavioral Disorder Associated with Prenatal Alcohol Exposure

Monday, November 19, 2018 at 12:15 p.m. ET *(Note change in date/time!)*

This webinar will focus on the factors in a patient's medical history and clinical presentation that may indicate the presence of Neurobehavioral Disorder Associated with Prenatal Alcohol Exposure. Participants will learn about the three domains in which children with this disorder struggle with behavior and developmental tasks. The definition of ND-PAE from the DSM-5 and related issues regarding more than minimal exposure to alcohol will be shared. The ways that ND-PAE may present in clinic through the developmental stages and strategies for managing care will be covered.

Learning Objectives: At the end of this webinar, participants will be able to:

- 1) Describe diagnosis of ND-PAE
- 2) Explain the importance of obtaining prenatal alcohol exposure information on EVERY patient
- 3) Describe ND-PAE across development

Speaker: Dr. John Stirling is a pediatrician at the Chadwick Center for Children and Families at Rady Children's Hospital-San Diego. Board certified in the subspecialty of child abuse pediatrics, he served as director of the Center for Child Protection at Santa Clara Valley Medical Center, from 2007 to 2016. As an adjunct professor of pediatrics, Dr. Stirling also originated and chaired the Suspected Child Abuse and Neglect Committee at Stanford Children's Hospital. He has served on the AAP's Committee on Child Abuse and Neglect, receiving the Academy's Award for Outstanding Service to Maltreated Children, and is the AAP District 9 representative of the FASD Champions Network.

Webinar #3: Treatment Across the Lifespan for Persons with Fetal Alcohol Spectrum Disorders

Wednesday, November 28, 2018 at 12:15-1:15 p.m. ET

This webinar will aim to provide primary care clinicians with the tools they need to treat children with FASDs across the lifespan. The session will focus on identifying and managing neurobehavioral and medical concerns at different developmental stages. Participants will learn about medical, therapeutic, and pharmaceutical considerations. Faculty will present evidence-based interventions that are applicable to community-based primary care pediatricians. Specifically, approaches to building parent knowledge and working with the school system on individualized education programs (IEPs) and 504 Plans will be discussed. Support services and resources for providers, families, and teachers/schools will also be covered.

Learning Objectives: At the end of this webinar, participants will be able to:

- 1) Describe developmental and functional concerns for individuals with FASDs and their families.
- 2) Discuss the care of individuals with FASDs from infancy to adolescence.
- 3) Discuss support services and resources for families and providers.

Speaker: Dr. Douglas Waite is a pediatrician and Assistant Clinical Professor of Pediatrics at Mount Sinai Hospital. He is medical director of The Children's Village, a community foster care agency and residential treatment center. Dr. Waite has worked at The Keith Haring Clinic to teach medical students and residents the challenges of providing comprehensive medical care to children in foster care and the juvenile justice system. He was elected one of ten national FASD Champions by the AAP in 2016 and also sits on the National Mental Health Advisory Board of the Child Welfare League of America. Dr. Waite has special interests in FASDs, post-traumatic stress disorder and the effects of child abuse and neglect upon child development.
