

A survey for Maryland parents of children with disabilities or special health care needs

Every five years the Department of Health and Mental Hygiene must conduct a Needs Assessment to determine where money will be spent and the need for more or different programs to be available for families of children with special health care needs and disabilities.

This is your opportunity to make a difference! We are asking you to spend about 10 minutes filling out the survey found at the link provided below.

This survey is completely anonymous and will be used for the purpose of collecting data on the needs of families of children across Maryland. DHMH contracted with the Parents' Place to collect information directly from families. The survey was designed and is distributed by Maryland families in partnership with providers across the state.

We truly appreciate the time you spend and the information you share that will have a direct impact on services and supports for children and families in this state.

If you would like a paper version or have questions about the survey please contact Josie Thomas at 410-768-9100 or josie@ppmd.org.

Please click on the link to go to the survey. If the link doesn't work, please cut and paste the link into your web browser.

Please feel free to share this survey with other Maryland families. If you are not the parent of a child with disabilities or special health care needs, please forward this email to any families or others who may want to participate.

Thank you so much for your time!

Sincerely,
Josie Thomas
The Parents' Place of Maryland
