Pediatric Symptom Checklist

The Pediatric Symptom Checklist is a psychosocial screen designed to facilitate the recognition of cognitive, emotional, and behavioral problems so that appropriate interventions can be initiated as early as possible. Included here are two versions, the parent-completed version (PSC) and the youth self-report (Y-PSC). The Y-PSC can be administered to adolescents ages 11 and up.

INSTRUCTIONS FOR SCORING

HOW TO INTERPRET THE PSC OR Y-PSC

REFERENCES

The PSC consists of 35 items that are rated as "Never," "Sometimes," or "Often" present and scored 0, 1, and 2, respectively. The total score is calculated by adding together the score for each of the 35 items. For children and adolescents ages 6 through 16, a cutoff score of 28 or higher indicates psychological impairment. For children ages 4 and 5, the PSC cutoff score is 24 or higher (Little et al., 1994; Pagano et al., 1996). The cutoff score for the Y-PSC is 30 or higher. Items that are left blank are simply ignored (i.e., score equals 0). If four or more items are left blank, the questionnaire is considered invalid.

A positive score on the PSC or Y-PSC suggests the need for further evaluation by a qualified health (e.g., M.D., R.N.) or mental health (e.g., Ph.D., L.I.C.S.W.) professional. Both false positives and false negatives occur, and only an experienced health professional should interpret a positive PSC or Y-PSC score as anything other than a suggestion that further evaluation may be helpful. Data from past studies using the PSC and Y-PSC indicate that two out of three children and adolescents who screen positive on the PSC or Y-PSC will be correctly identified as having moderate to serious impairment in psychosocial functioning. The one child or adolescent "incorrectly" identified usually has at least mild impairment, although a small percentage of children and adolescents turn out to have very little or no impairment (e.g., an adequately functioning child or adolescent of an overly anxious parent). Data on PSC and Y-PSC negative screens indicate 95 percent accuracy, which, although statistically adequate, still means that 1 out of 20 children and adolescents rated as functioning adequately may actually be impaired. The inevitability of both false-positive and false-negative screens underscores the importance of experienced clinical judgment in interpreting PSC scores. Therefore, it is especially important for parents or other laypeople who administer the form to consult with a licensed professional if their child receives a PSC or Y-PSC positive score.

Pediatric Symptom Checklist (PSC)

Emotional and physical health go together in children. Because parents are often the first to notice a problem with their child's behavior, emotions, or learning, you may help your child get the best care possible by answering these questions. Please indicate which statement best describes your child.

Please mark under the heading that best describes your child: Never **Sometimes** Often 1. Complains of aches and pains 1 2 2. Spends more time alone 3 3. Tires easily, has little energy 4. Fidgety, unable to sit still 4 5 5. Has trouble with teacher 6. Less interested in school 6 7 7. Acts as if driven by a motor 8. Daydreams too much 8 9. Distracted easily 9 10. Is afraid of new situations 10 11. Feels sad, unhappy 11 12. Is irritable, angry 12 13 13. Feels hopeless 14 14. Has trouble concentrating 15. Less interested in friends 15 16. Fights with other children 16 17. Absent from school 17 18. School grades dropping 18 19. Is down on him or herself 19 20. Visits the doctor with doctor finding nothing wrong 20 21. Has trouble sleeping 21 22 22. Worries a lot 23. Wants to be with you more than before 23 24. Feels he or she is bad 24 25 25. Takes unnecessary risks 26. Gets hurt frequently 26 27. Seems to be having less fun 27 28. Acts younger than children his or her age 28 29. Does not listen to rules 29 30. Does not show feelings 30 31. Does not understand other people's feelings 31 32. Teases others 32 33. Blames others for his or her troubles 33 34. Takes things that do not belong to him or her 34 35. Refuses to share 35 Total score Does your child have any emotional or behavioral problems for which she or he needs help? () N ()Y Are there any services that you would like your child to receive for these problems? () N ()Y

If yes, what services?_
