

For adolescents receiving the COVID-19 vaccine, co-administration of the COVID-19 vaccine with other routine adolescent vaccinations, including the HPV vaccine, should help health care providers catch-up on vaccinations. Parents are encouraged to ensure children are up to date on all routine immunizations.

Below, please find a selection of materials, developed by the CDC or National HPV Vaccination Roundtable, to assist you in your efforts to increase HPV vaccination awareness. The fact sheets may be used by providers in conversations with parents and the video and radio public service announcements (PSAs) may be used in provider office waiting rooms. These materials are available at no cost by visiting <https://phpa.health.maryland.gov/cancer/Pages/HPV.aspx> or by visiting the individual links listed in the table below.
