

Keep Everyone Safe During COVID-19

Practice Good Hygiene

Stop hand-shakes; use non-contact greeting methods.

Clean hands at the door and schedule regular hand-washing reminders.

Disinfect surfaces like doorknobs, tables, and desks regularly.

Avoid touching your face. Cover your coughs and sneezes.

Increase ventilation by opening windows or adjusting air conditioning.

**GET VACCINATED!
TAKE YOUR WORLD BACK!**

Limit Meetings & Non-Essential Travel

Use video conferencing instead of face-to-face meetings.

When video calls are not possible, hold your meetings in well-ventilated rooms and spaces.

Suspend non-essential travel to Level 3 and 4 countries - see "COVID-19 Travel Recommendations by Destination" at www.CDC.gov. Be fully vaccinated before you travel.

Take Care Of Your Emotional & Mental Well-Being

Outbreaks are a stressful and anxious time for everyone - ask for help!

Stay home if...

- You are **feeling sick**.
- You have a **sick family member** at home.
- You have a **fever**.

Project Firstline is a national collaborative led by the U.S. Centers for Disease Control and Prevention (CDC) to provide infection control training and education to frontline healthcare workers and public health personnel. American Academy of Pediatrics is proud to partner with Project Firstline, as supported through Cooperative Agreement CDC-RFA-OT18-1802. CDC is an agency within the Department of Health and Human Services (HHS). The contents of this program do not necessarily represent the policies of CDC or HHS and should not be considered an endorsement by the Federal Government.
