

## MDAAP Chapter Rural Health Meeting Speakers

Lisa Selby is a Program Manager at the University of Maryland School of Medicine in the Division of Child and Adolescent Psychiatry. She has an MA in Counseling Psychology and is a Licensed Clinical Professional Counselor in Maryland with over 20 years of experience working with children and families in various capacities including schools and residential settings. She currently works for the Maryland Behavioral Health Integration in Pediatric Primary Care Program, a child psychiatry access program, providing supervision to masters-level mental health staff and supporting the day-to-day activities of the program.

Dr. Amie Bettencourt is a clinical child psychologist and Associate Professor in the Johns Hopkins School of Medicine Department of Psychiatry and Behavioral Sciences with joint faculty appointments in the Johns Hopkins Bloomberg School of Public Health and the Johns Hopkins School of Nursing. She is the Director of Research and Evaluation for Maryland Behavioral Health Integration in Pediatric Primary Care (MD BHIPP) which is a multi-university partnership between the Johns Hopkins School of Medicine, the University of Maryland Baltimore School of Medicine, the Salisbury University School of Social Work and the University of Maryland Eastern Shore, whose mission is to increase access to pediatric mental health services for Maryland's children through workforce development of pediatric primary care providers, emergency medicine providers and behavioral health providers. Dr. Bettencourt is also the Director of Training for the Chicago Parent Program which is an evidence-based parenting skills program. Dr. Bettencourt's research focuses on identifying risk and protective factors associated with the development of disruptive behavior problems, and evaluating efforts to integrate evidence-based interventions designed to prevent and treat pediatric mental health problems into early education, school, and primary care settings. Clinically, Dr. Bettencourt's focus is on the prevention and treatment of pediatric mental health problems in children, with a particular focus on parenting interventions.

Rheanna Platt is a child/adolescent psychiatrist and associate professor of psychiatry and behavioral sciences at the Johns Hopkins University School of Medicine. She is the medical director of the Latino Family Clinic at Johns Hopkins Bayview Medical Center and a consultant on the BHIPP team, supporting the efforts of pediatric primary care providers to assess and manage the mental health needs of their patients. Her research interests include the implementation of mental health and family psychosocial screening in primary care pediatric settings and mental health promotion within primary care and community-based settings.
